

## Notice for international patients who would like to have consultation and treatment at Chiba University Hospital

As a general rule, we ask that international residential patients contact an international medical coordinator to arrange consultations and ensure safe treatment. Chiba University Hospital has a coordinate agreement with Emergency Assistance Japan (EAJ) and our International Center works closely with EAJ to provide care and treatment for international patients.

**For international residential patients who would like to have consultation and treatment at Chiba University Hospital, please contact EAJ as the first step.**

We appreciate your understanding and cooperation. Please kindly be noted that the coordination fees are borne by the patients.

We will coordinate with EAJ to ensure that consultations and treatment are conducted smoothly and safely.
